

Program Description:

The course focuses on developing your design aspects of websites.

It is practically orientated, providing working knowledge of the IT environment. Students may specialize in web programming, Multimedia and Web Design.

To pass an examination a candidate must demonstrate both practical skills AND underpinning knowledge (competencies). The programming examination, for example, requires a candidate both to program in an object oriented language and to understand the principles of software engineering

Students, High School leavers can access the program to gain skill in the IT Environment. They may further their study in vocational education or seek work in the field.

Entry Requirements:

Completed year 10 or have a job in the vocation. International students may enter the course with 5.5 IELTS score or the completion of English Study.

English support classes are available.

Program Resources:

Students will be supplied with textbooks, course material, stationery, and other items needed for the course.

Employment opportunities:

Graduates will have acquired the skills to secure employment in a variety of office-related positions in small, medium or large businesses as an administrative assistant or personal assistant

Learning pathways:

On successful completion of this course, graduates may consider further study at a higher tertiary level within the vocational education and training sector.

Students may access study the Diploma of IT on completion.

Recognition of Prior Learning:

Provides students an opportunity to have their current skills and competencies recognized. These skills and competencies may relate to units you are about to commence and as a result can exempt you from studying these units. However, there is a cost related to obtaining Recognition of Prior Learning. The process requires students to gather evidence confirming their competency. A content specialist will advise you in this task. Enquire if you think you qualify.

If the education provider grants an overseas student RPL, it may impact on student visa conditions through a shortening of the student's course.

Learning Program - Units of Competency

Your course is delivered in subject format:

- Web Design
- Animation
- Web Programming, CSS, JavaScripts
- Digital Imaging - Photo Manipulation
- Visual Design

6. Get an Offer
7. Accept the Offer
8. Pay enrolment fees
9. Get a COE
10. Update DIAC with new COE

Units of Competence

	Units of Competence
ICAD3218A	Create User Documentation
ICAD4217A	Create Technical Documentation
BSBCMN304A	Contribute to personal skill development and learning
CUSADM08A	Address copyright requirements
ICAA4041A	Determine and confirm client business expectations and needs
ICAB4135A	Create a simple mark-up language document to specification
ICAB4225A	Automate processes
ICAD4043A	Develop and present a feasibility report
ICAD4217A	Create technical documentation
ICAI4189A	Ensure website content meets technical protocols and standards
ICAT4221A	Locate equipment, system and software faults
ICAU4205A	Select and employ software and hardware tools
ICAW4214A	Maintain ethical conduct
PSPPM402B	Manage simple projects
ICAA4142A	Design a website to meet technical requirements
ICAA4233A	Determine and apply appropriate development methodologies
ICAB4137A	Produce basic client side script for dynamic web pages (Prerequisite to 16)
ICAB4171A	Develop cascading style sheets
ICAD4198A	Develop guidelines for up-loading information to a website
ICAS4201A	Transfer content to a website using commercial packages
ICAT4183A	Confirm accessibility of website for people with special needs
ICAU4207A	Apply web authoring tool to convert client data for websites
ICPMM321A	Capture a digital image
CUFMEM12A	Update web pages
CUFMEM07A	Apply principles of visual design and communication to the development of a multimedia product
