

Program Description:

It is practically orientated, providing working knowledge of the IT environment. Students may specialize in web programming, Multimedia & Web Design, Application Programming and Networking.

To pass an examination a candidate must demonstrate both practical skills AND underpinning knowledge (competencies). The programming examination, for example, requires a candidate both to program in an object oriented language and to understand the principles of software engineering

Students, High School leavers can access the program to gain skill in the IT Environment. They may further their study in vocational education or seek work in the field.

International Students can build a career in the IT Industry. International candidates who qualifications mat seek to have their qualifications evaluated.

Entry Requirements:

Completed year 10 or have a job in the vocation. International students may enter the course with 5.5 IELTS score or the completion of English Study and the equivalent of year 12.

English support classes are available.

Program Resources:

Students will be supplied with textbooks, course material, stationery, and other items needed for the course.

Employment opportunities:

Graduates will have acquired the skills to secure employment in a variety of office-related positions in small, medium or large businesses as an administrative assistant or personal assistant

Learning pathways:

On successful completion of this course, graduates may consider further study at a higher tertiary level within the vocational education and training sector.

Students may access study the Bachelor of IT or Bachelor of Multimedia at university

Recognition of Prior Learning:

Provides students an opportunity to have their current skills and competencies recognized. These skills and competencies may relate to units you are about to commence and as a result can exempt you from studying these units. However, there is a cost related to obtaining Recognition of Prior Learning. The process requires students to gather evidence confirming their competency. A content specialist will advise you in this task. Enquire if you think you qualify.

If the education provider grants an overseas student RPL, it may impact on student visa conditions through a shortening of the student's course.

Learning Program - Units of Competency

Your course is delivered in subject format:

- Web Design
- Animation
- Web Programming, CSS, JavaScripts
- Digital Imaging - Photo Manipulation
- Visual Design
- Programming – VB
- Computer Server Infrastructure
- Network Design, Firewall, Computer Server
- Digital Audio and Digital Video Creation
- Computer Network
- Project Management

Next Level of Study:

Bachelor of IT

Local Information on Brisbane:

For the up to date information on life in Brisbane, Australia visit the www.ourbrisbane.com website

5. Fill in an InTech Enrolment form
6. Get an Offer
7. Accept the Offer
8. Pay enrolment fees
9. Get a COE
10. Update DIAC with new COE

Units of Competence

BSBCM106A	Follow workplace safety procedures
ICAU1128A	Operate personal computer
ICAU2005A	Operate computer hardware
ICAU2006A	Operate computing packages
ICAU2013A	Integrate commercial computing packages
ICAU2231A	Use computer operating system
ICAW2001A	Work effectively in an IT environment
ICAW2002A	Communicate in the workplace
ICAD2012A	Design organisational documents using computing packages
BSBPM505A	Manage project quality
ICAA5056A	Prepare disaster recovery and contingency plans ICAA5158A
	Translate business needs into technical requirements
ICAP5039A	Match IT needs with the strategic direction of the enterprise
ICAS5202A	Ensure privacy for users
PSPPM502B	Manage complex projects
ICAB4229A	Apply intermediate programming skills in another language
ICAB5230A	Maintain custom software
ICAT5079A	Perform Integration Test
ICAI5173A	Install and configure a single-segment local area network switch
ICAI5176A	Install and configure router ICAB5159A
	Build a Security Shield for a Network
ICAI5152A	Evaluate Risk Management Processes
ICAI5088A	Evaluate and Negotiate Vendor Offerings
ICAA515A	Gather data to identify business requirements
ICAA5140A	Design a Server
ICAA5045A	Produce Network Architecture Design
ICAB5160A	Build and configure a server
ICAA5148A	Select new Technology models for Business
ICAA5141A	Design dynamic websites to meet technical requirements
ICAB5165A	Create dynamic pages
